DATA REQUEST SET 3 FROM CLEAN ENERGY DATED MAY 24, 2023

SOCALGAS RESPONSE DATED: JUNE 8, 2023

3-1. For each of SoCalGas's public-access CNG vehicle refueling stations:

- a. Please provide a description of how SoCalGas tracks volumes associated with public-access sales and volumes associated with private fleet fueling.

Response 3-1a.

SoCalGas uses the G-NGV meter serving each of the SoCalGas public access CNG stations to measure total station volume and dispenser meters at each public access CNG station to measure public-access sales. The difference between total station volume and public access sales is associated with private fleet fueling.

- b. Please provide a breakdown of the total volumes attributable to customer sales and the total volumes attributable to private fleet refueling.

Response 3-1b.
