

THE UTILITY REFORM NETWORK DATA REQUEST
TURN-DR-005
SDG&E/SOCALGAS 2021 RAMP REPORTS- A.21-05-011/014
DATE RECEIVED: JULY 12, 2021
DATE RESPONDED: JULY 26, 2021

Question 1:

At today's workshop, you indicated in response to our question that you would be able to provide a spreadsheet version of the WiNGS workpapers. To be more specific, we request the Wings WP in Excel with working formulas, including an additional column with the number of miles of each segment.

SDG&E Response 01:

SDG&E notes that this data request was submitted to SDG&E informally via email. For tracking purposes, SDG&E has formally titled this data request "TURN Data Request-005."

Please see attached excel spreadsheet titled "2021 RAMP WiNGS Workpaper 7_7_2021 - Table" that is provided concurrently with this response.

In developing this spreadsheet, SDG&E notes that it corrected references in the spreadsheet that slightly changed the calculated risk values. However, those changes do not affect the overall outcomes of the analysis.

To assist with understanding the analysis, descriptions of the calculated columns are included in the spreadsheet and can be viewed by hovering a cursor over the column title cells of the table.
