

**THE UTILITY REFORM NETWORK DATA REQUEST  
TURN-DR-006-SUPPLEMENTAL  
SDG&E/SOCALGAS 2021 RAMP REPORTS- A.21-05-011/014  
DATE RECEIVED: SEPTEMBER 8, 2021  
DATE RESPONDED: SEPTEMBER 17, 2021**

**Question 1:**

**Request (from TURN's email dated September 8, 2021):**

This email is just to have a written record of the oral request TURN made at the 9/2 workshop for a breakdown of the WiNGS workpaper by Tier 3 and Tier 2 and by covered conductor and strategic undergrounding, in other words 4 separate workpapers. This breakdown is necessary to be consistent with the other Wildfire workpapers showing how RSEs were calculated. SDG&E representatives agreed to provide this information.

Please let me know when we can expect to receive this breakdown.

**SDG&E Response 01:**

SDG&E has modified and updated the data previously provided in the WiNGS workpaper (originally provided in reply to TURN DR#5 and updated in reply to TURN DR#6) in a manner that provides TURN to ability to sort the data based on different criteria. As provided, the data has been sorted to identify which of the segments are in the Tier 2 vs Tier 3 High Fire Threat Districts and then sub-sorted to identify which of those segments are planned to be included in the covered conductor hardening mitigation vs the strategic underground hardening mitigation.

The modified/updated data is provided in the separately attached spreadsheet: TURN DR6 Excel Response – Updated\_September 17 2021.xlsx.
